: Serenity

If your cot is not on this list, please email us sales@babyhugs.com.au

Please note :

Cots without castors will need an 8mm hole drilled 25mm deep in the centre of each leg underneath, to allow for the central locating pins, for extra stability. Please see the web site under the link "Lullabub details" and click on the orange link which says "Cot leg without wheels"

Cots with castors will simply need the castor pulled off, and the hole will be there. If you are in doubt please email us at sales@babyhugs.com.au
